BASIC ENGINEERING

Bridge Course

The bridge course acts as a foundation course and it concentrates on the basic concepts and practical applications that facilitate the path of learning and enable the successive years, a cake walk for the students.

Course contents

In the first year, students are trained in Mathematics, Engineering Physics, Engineering Chemistry, English and Engineering Graphics. Basic Engineering is equipped with Physics Lab, Chemistry Lab, Workshop and Computer Application Lab.

Physics / Chemistry / Workshop

Students are allowed to do their experiments individually. Useful information is displayed through charts to enhance their knowledge.
